TI Chimeric molecules for cleavage in a treated host
AB The present invention relates to chimeric molecules containing component molecules that are linked together in a non-naturally occurring manner where the linker contains at least one enzyme cleavage site, and the enzyme cleavage site is engineered to be cleaved by an enzyme in a treated subject. The present invention also relates to compositions and kits containing the chimeric molecules, methods of making the chimeric molecules in a production host, methods of using the present chimeric molecules for diagnostic, prophylactic, therapeutic, and nutritional purposes in subjects requiring such.
